Art Unit: 1752

1. Claims 14-18, 23-27, 32-36 and 41-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The terms "second ... diode", "second...device" and "second transistor" of the instant claims are indefinite since first diodes , devices or transistors are not set forth.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Murphy et al. Murphy et al. ( see particularly col.3, lines 34-64 ; col.6, line 4-col. 7, line15; col. 16, lines 4-15; example 9 ) discloses layers containing conductive polymer and metal conductive patterns. The metal is Ag from the reduction of AgNO<sub>3</sub> as seen in ex. 9 or is from the added noble metal salts. The instant claims do not exclude layers where the conductive polymers are also in a pattern.

3. Claims 2, 4 and 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art cited by applicants has been considered.
